

LEADEN HALL SCHOOL

PROJECT:

The Leaden Hall School is a preparatory school for girls located within the Salisbury Cathedral Close, England.

CLIENT:

Leaden Hall School Limited

SCOPE OF WORK:

Crocker Ltd was retained to design and install a foundation system for a new school building built on the floodplain of the Avon River. Compliance with English Heritage specifications required that the foundation not disturb Roman-era archeological remains, be reversible, use no Portland cement, be capable of withstanding flood conditions and cause no vibration during installation. All conditions were met by using helical piers.
