

PALACE OF THE GOVERNORS

PROJECT:

This National Historic Landmark on Santa Fe's Plaza is the oldest continuously occupied public building (*ca.* 1610) in the United States.

CLIENT:

Museum of New Mexico

SCOPE OF WORK:

Crocker Ltd stabilized the north wall, which included stone and adobe repair, repointing with mud and lime mortars, and structural splicing of vigas. A final exterior plaster was designed using different colored renders to highlight the building's historic sequence of repairs and remodels.
